-----------	---

Presented to the Faculty
of the Graduate School of Education of Harvard University
in Partial Fulfillment of the Requirements
for the Certificate in Educating Global Citizens

2018

Elevator Pitch Transcript:

Advancing Climate Change for Global Citizens 🌀🔥

- Imagine a hurricane 🌀 that leaves behind absolute devastation. Your house is gone. Your friends are suffering. That was the devastation of Hurricane Michael in the Florida Panhandle where 25 people lost their lives.
- Imagine being trapped in the California wildfire 🔥, which has now claimed 44 lives.
- The United Nations Sustainable Development Goal 13 is to educate young people on climate change to put them on a sustainable path early on.
- I just became a part of the collaborative effort between the American Red Cross and Disney called the Pillowcase Project, which trains 1 million students in the US on disaster preparation 🚒
- I intend to have the students collaborate and share their experiences with international students to advance global education on preparation for natural disasters through technology and social media such as Facebook, Snapchat and Instagram. We are all part of one race - the human race.
